

Presentation - Goldfields Golf Club App

This presentation and guide is about the proposed rollout of the Goldfields Golf Club **App**. It is proposed that the App is an additional tool for communicating club fixtures, events and news. It is not proposed to replace any of the club's current communication methods, such as email, the booking portal and the new club website.

It is proposed at this stage, that the club will have 2 different Apps, one for **seniors** and 1 for **juniors**.

Tonight's presentation will include;

- How a new member accesses or registers to use the App - Set up a person present? (This document).
- A quick tour of the App's features (On screen presentation)
- A quick tour of the Administration Dashboard - Web-Based (On screen presentation)
- Q & A

Prior to starting the presentation, a few facts;

- The App is actually "TeamApp", customizable by any club.
- This is a restricted access App, members ask for access and access is granted by the administrator (or not). Member's access can be deleted by the administrator and persons wanting access, who are not members, access may not be granted. There are differing levels of access.
- Cost, it's free! TeamApp make their money from the advertising bars at the bottom of some views. I am sure posts etc, incur a cost against your data plan.
- The appearance of the App is controlled in the Web-Based Dashboard. There are 15 buttons to choose from, but a maximum of 10 only, can be used at once.
- Both versions of the App have been trialed by several members (limited).
- The App is also android based; however this has not been tested.
- The key is the App should be another means of accessing the information we already have and not necessarily create more work, or be an item we need to manage.

How a new member accesses or registers to use the App?

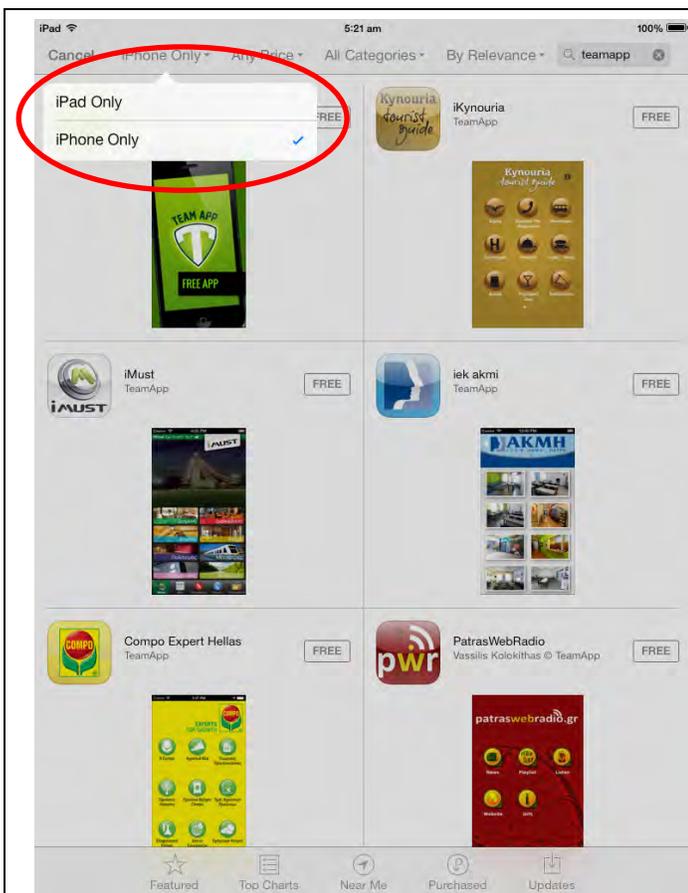

PLATE 1

Download TeamApp from the App Store, the App is an iPhone app, so be sure to check the correct search filter, or it won't be visible.

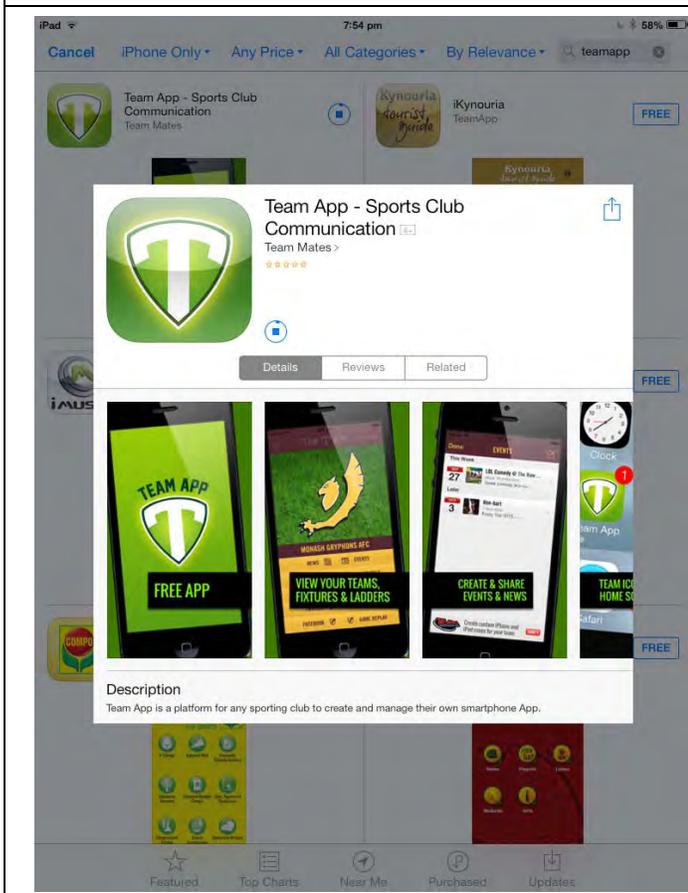

PLATE 2

Download TeamApp as normal, it is a free download.

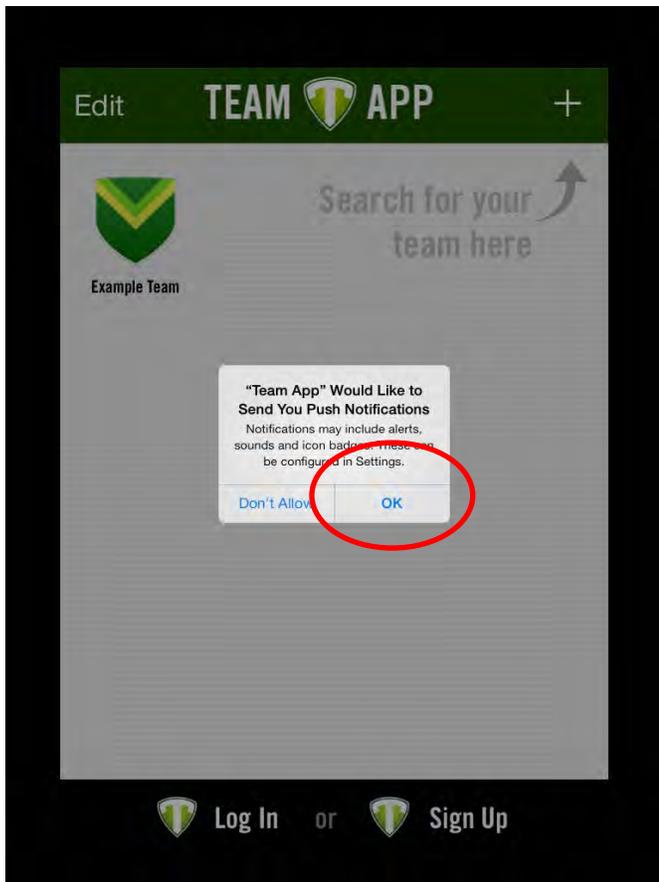

PLATE 3

If you click **OK**, this will allow the user to receive notifications, such as NEWS (ie. Cancellation of a fixture due to inclement weather).

PLATE 4

If you are a first time user, click on **Sign Up**.

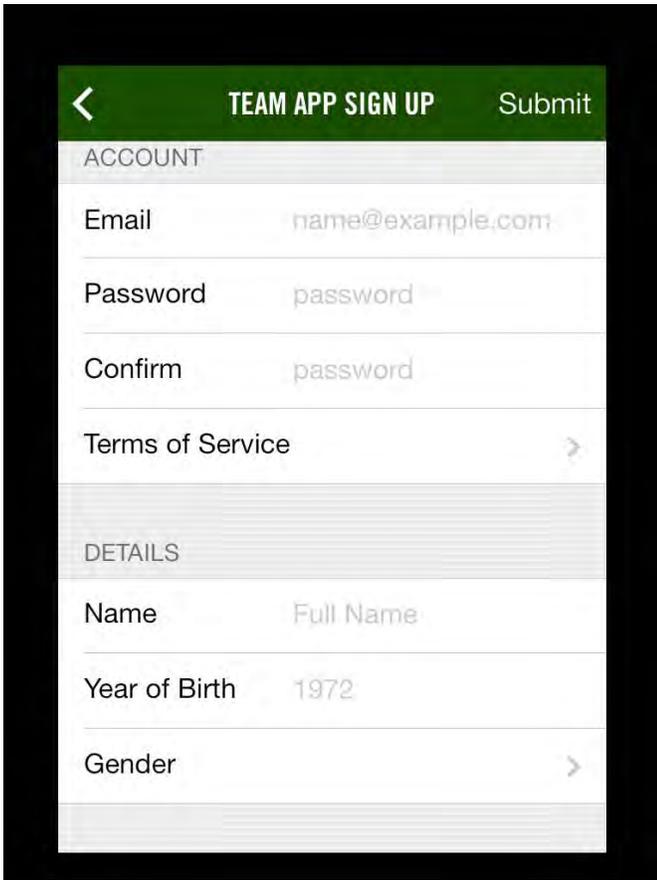

PLATE 5

The user enters their details. Please use your full name, no nick names etc, as this is the name the administrator will see and use to reconcile your membership and hence access.

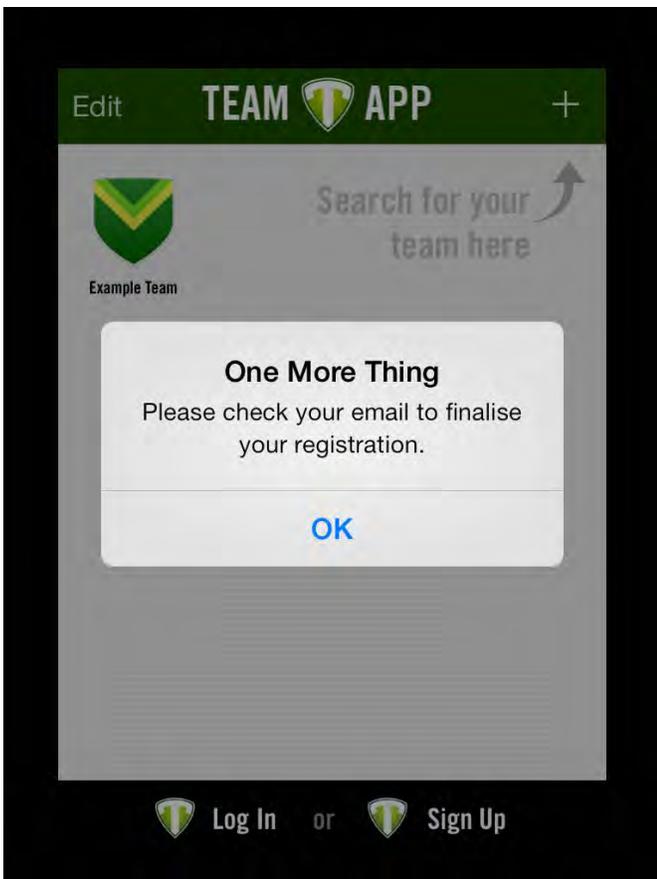

PLATE 6

Check your email account for a **TeamApp** email to finalize your registration to TeamApp.

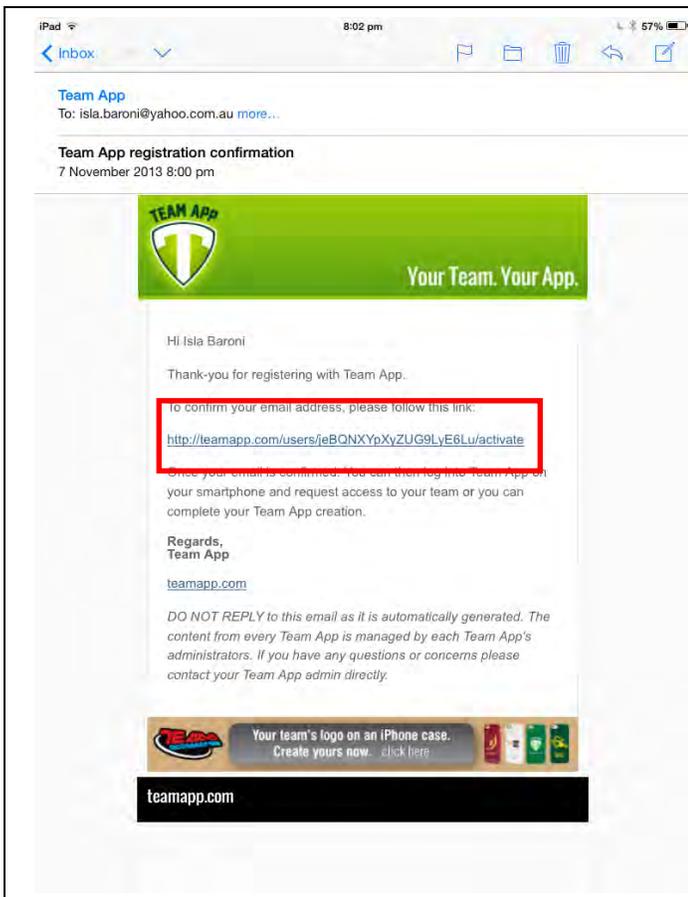

PLATE 7

Click on this link to complete registration to TeamApp. Please note this is only registration to the TeamApp and not access to the GGC version(s) of the App.

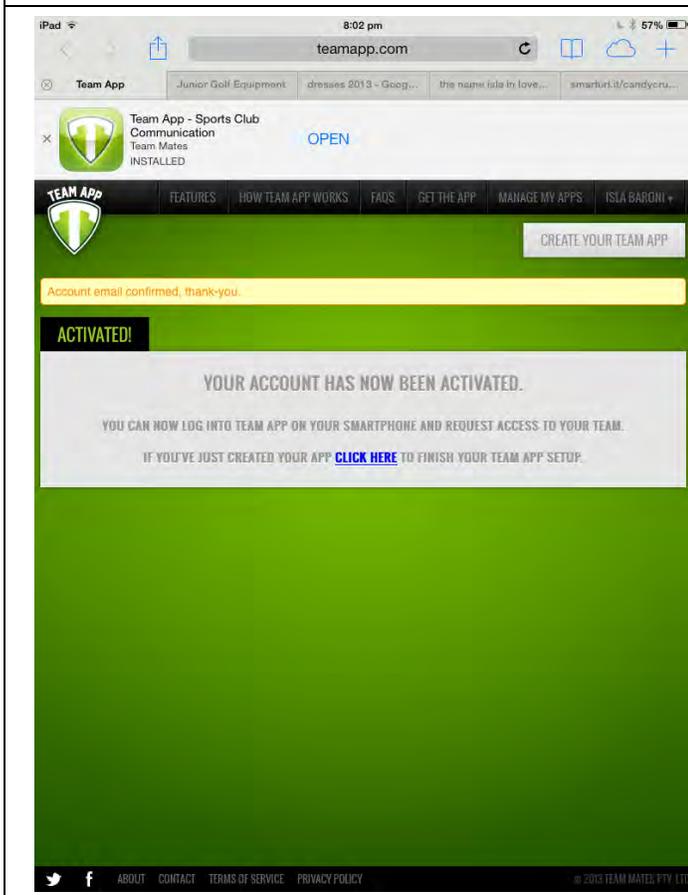

PLATE 8

Confirmation that the user is now registered with TeamApp.

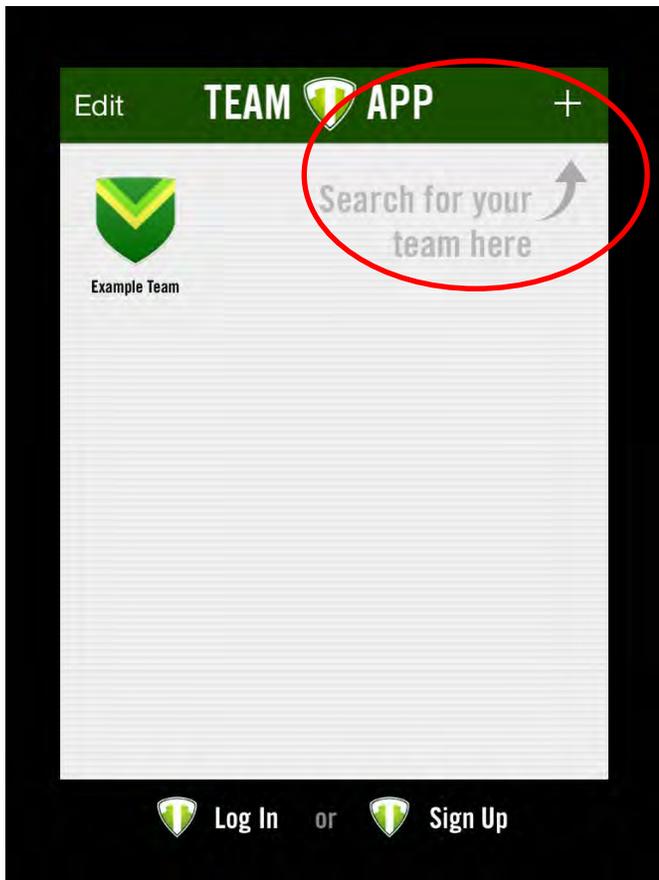

PLATE 9

Start your search for Goldfields Golf Club App, click the “+” sign.

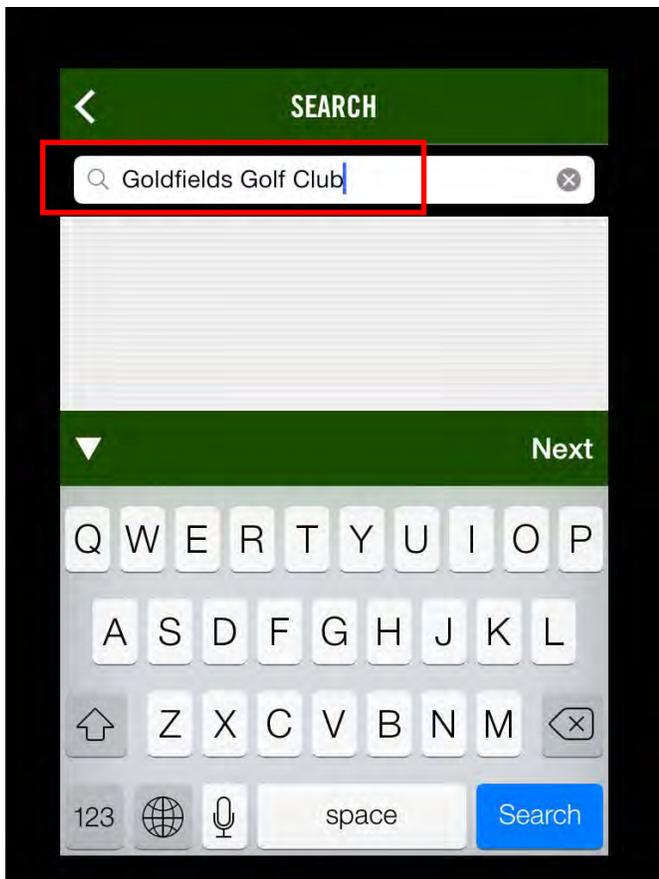

PLATE 10

Search for Goldfields Golf Club

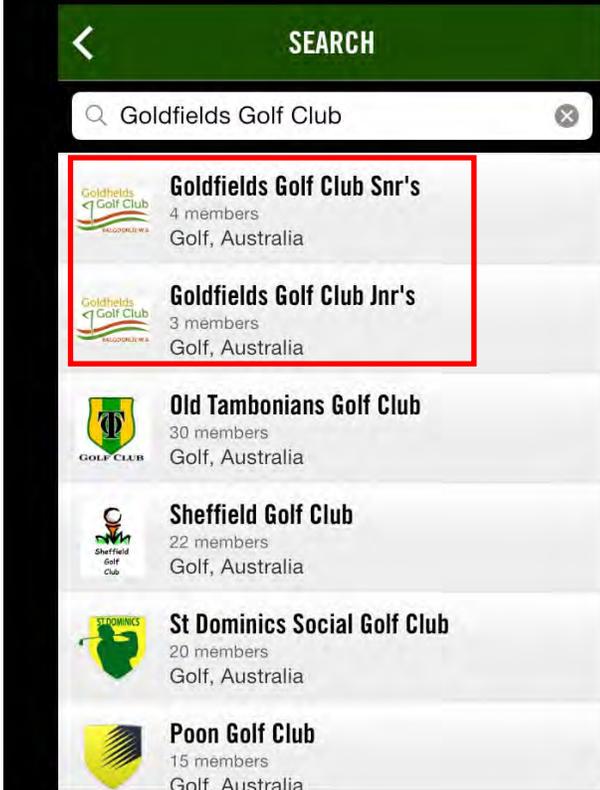

PLATE 11

Choose the appropriate App;
Goldfields Golf Club Snr's
Or
Goldfields Golf Club Jnr's

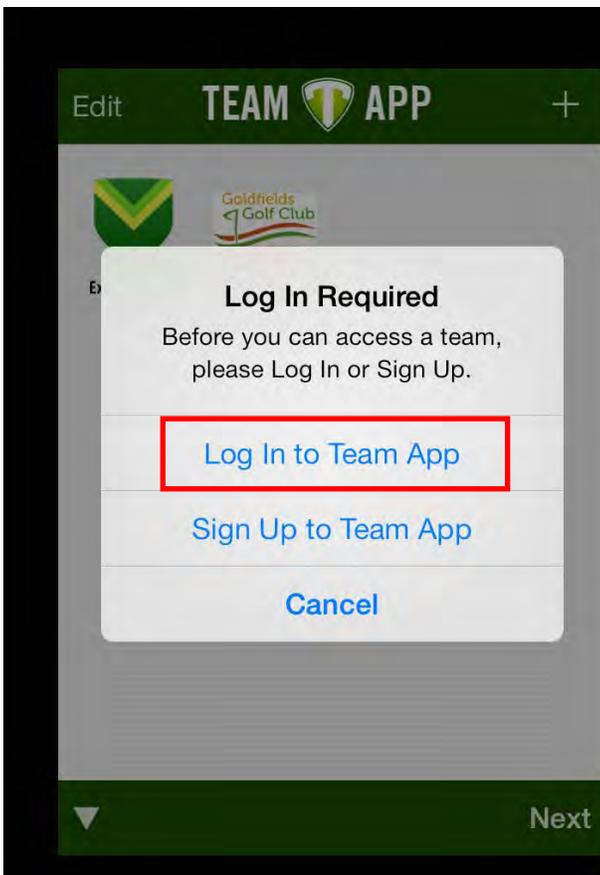

PLATE 12

Log In as the user should have previously Signed Up.

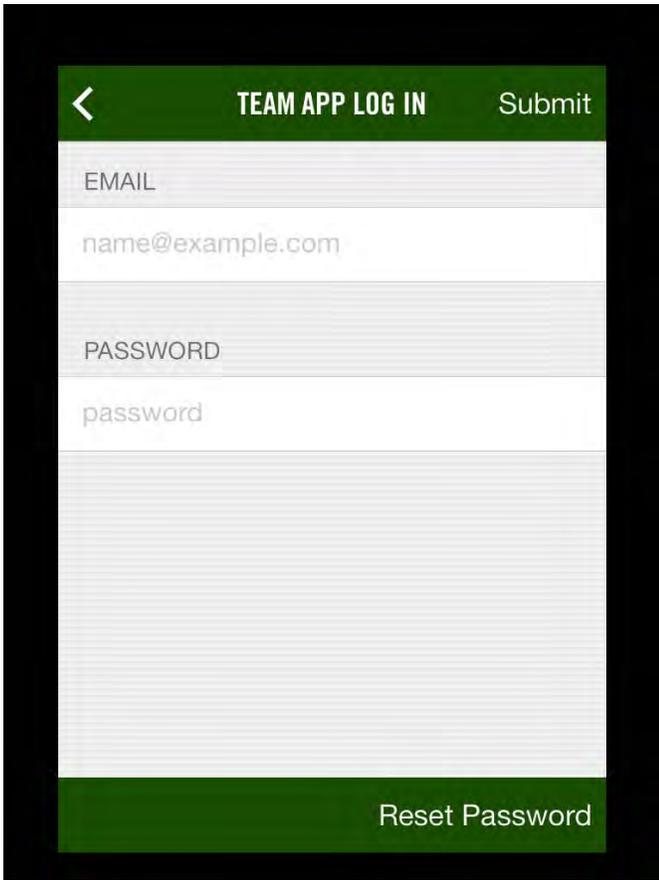

PLATE 13

Log In with users email and password.

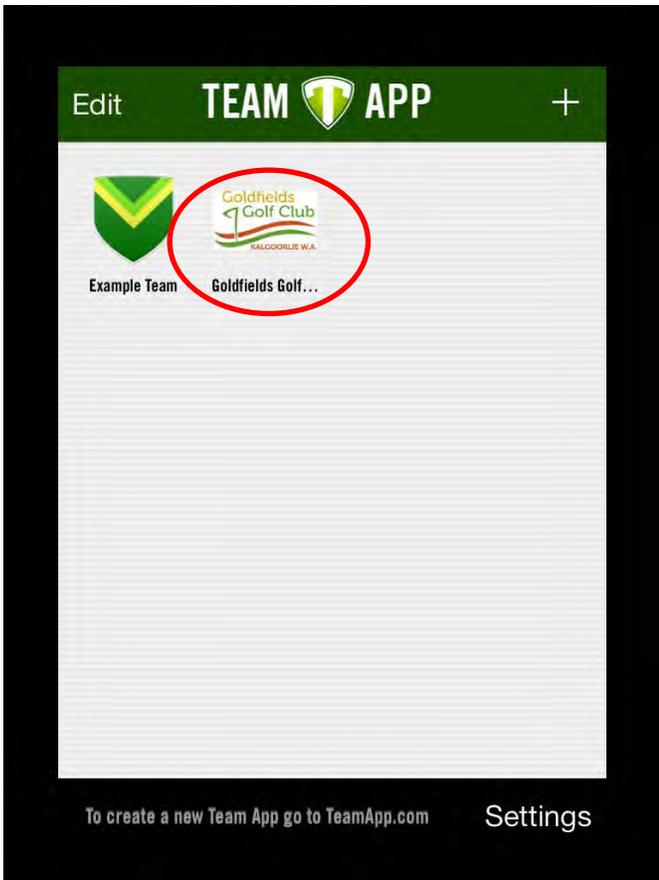

PLATE 14

Select which of the teams the user wishes to view at the time. A user can be a member of multiple teams or clubs.

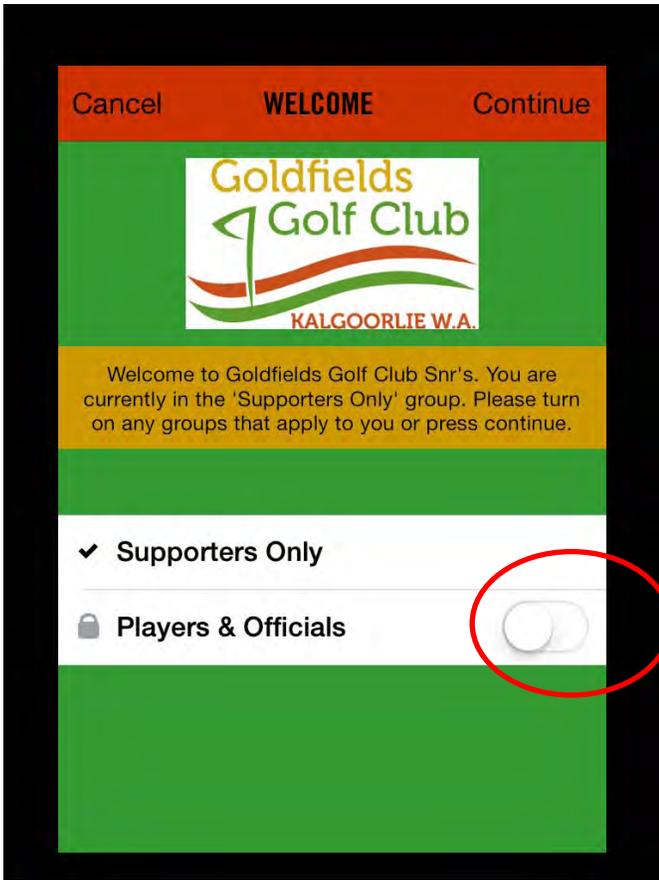

PLATE 15

Access to some of the information in the App is controlled by this permission. As an example, Supporters cannot see Team Lists or Availabilities. However, the information contained within the App in the GGC's case is not sensitive, it can be found on the club's website in the public access area.

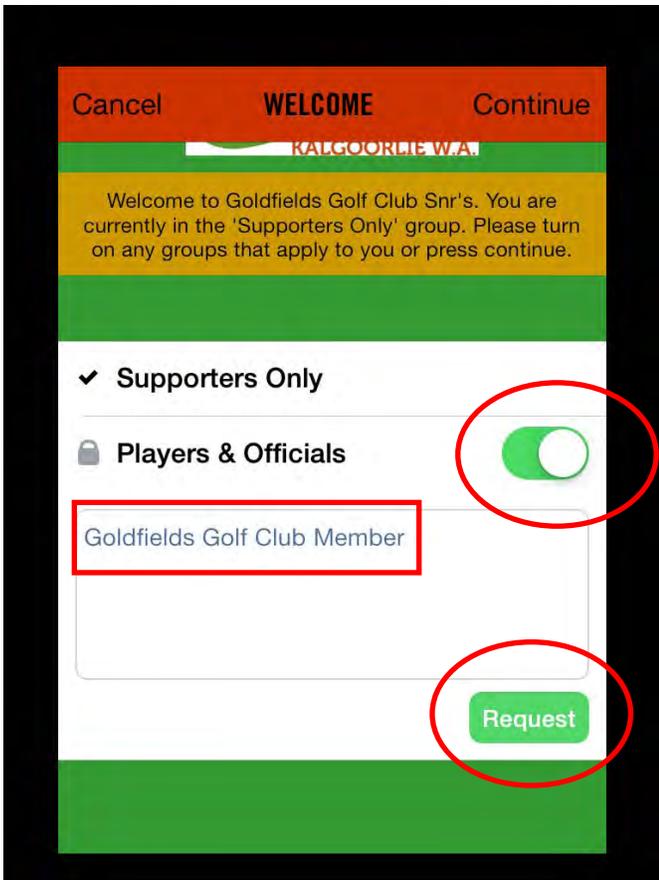

PLATE 16

It is suggested that all users select the **Players/Officials** status and slide the selector across (Officials, does not relate to administration rights).

Enter the reason for wanting this access, **Goldfields Golf Club Member**.

Click the **Request** button.

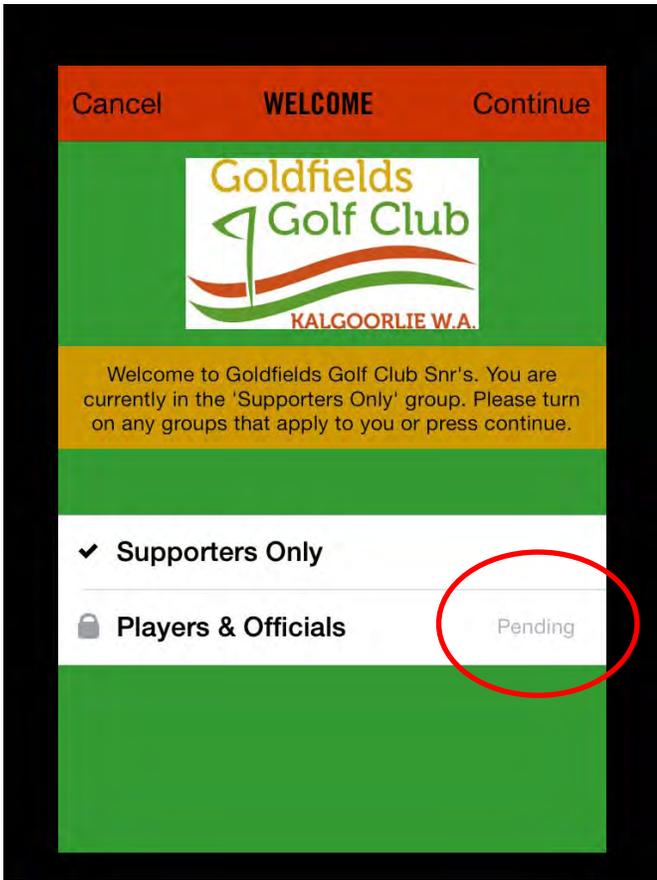

PLATE 17

The users request has been sent to the administrator and confirmation is **Pending**.

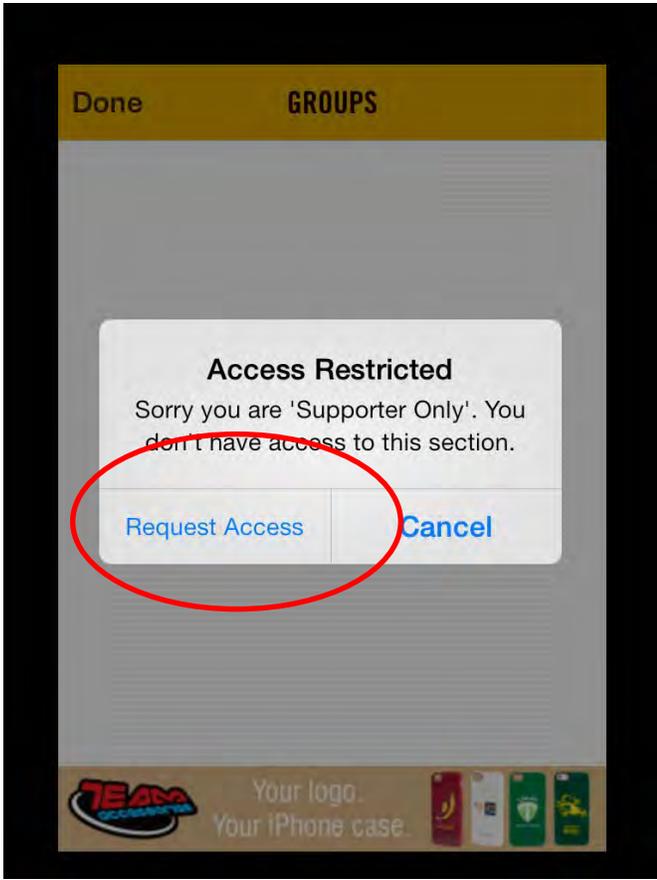

PLATE 18

Whilst confirmation is pending, some areas of the app are not accessible. This **Access Restricted** message appears, click on Request Access, if the administrator has not responded and some time has lapsed. The administrator will receive an email.

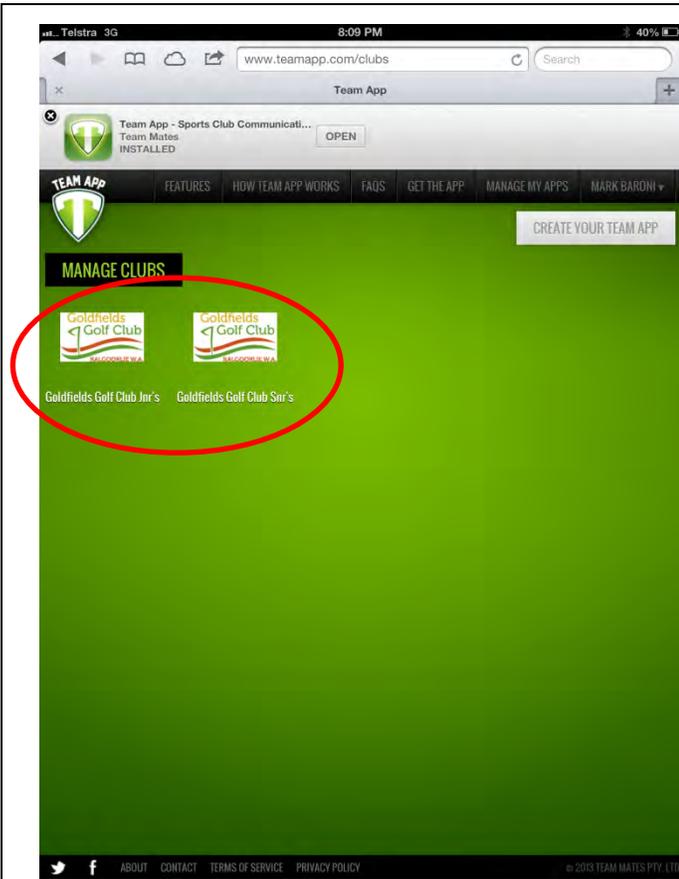

PLATE 19

This is the Web-version where the Administrator(s) controls the App(s) and the access of users.

Two versions are shown here, the Senior version and the Junior version, each is separately driven.

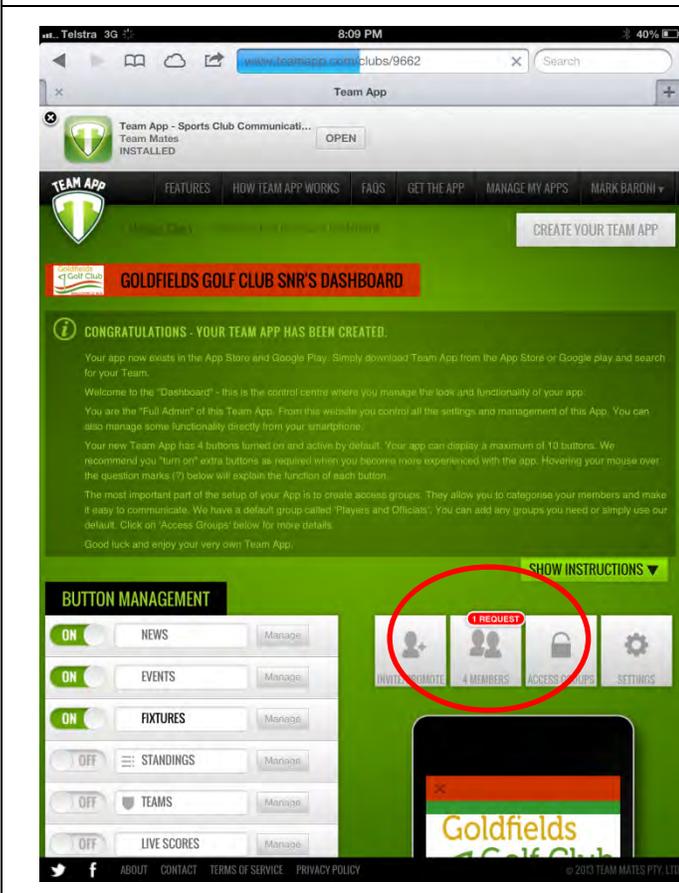

PLATE 20

This is Administrators Dashboard within the Web-version. An access request is flagged for the administrator to consider.

The administrator clicks on this square.

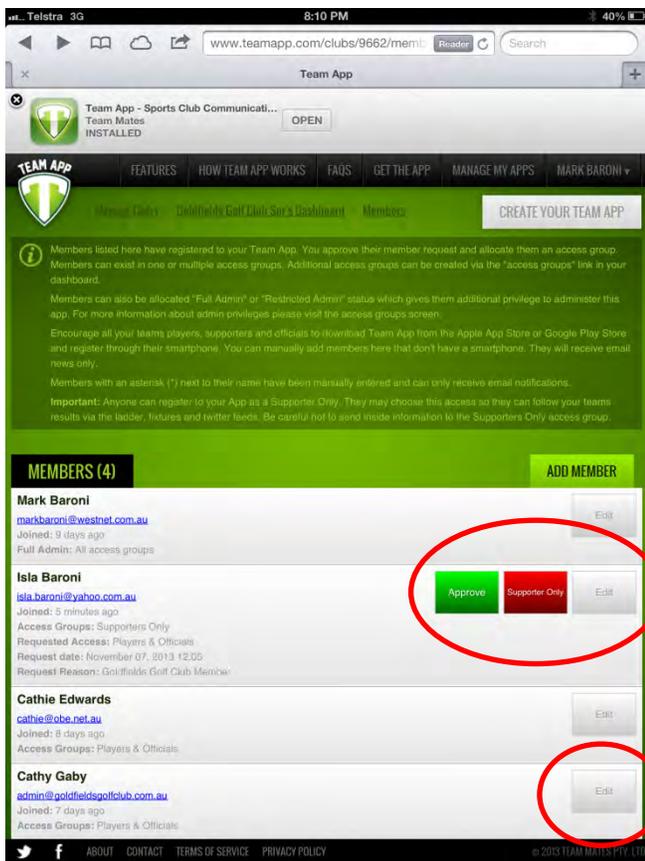

PLATE 21

Here the administrator can **Approve** or **Decline** the request. The user's details can be seen on the left.

Below an **Edit** button can be seen, the administrator can alter a users access permissions or even delete the member

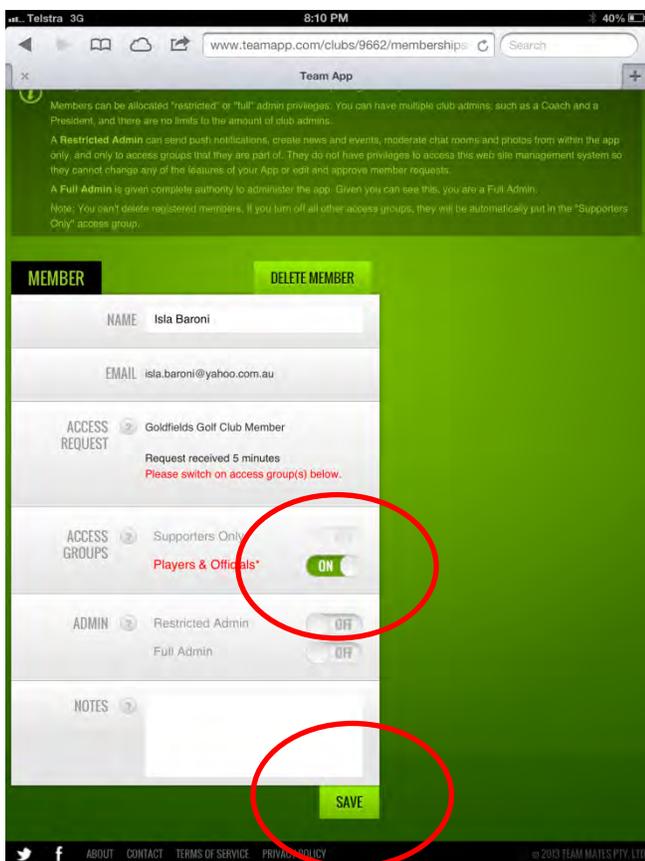

PLATE 22

When approving a user the administrator can select/alter the permissions and save the members details

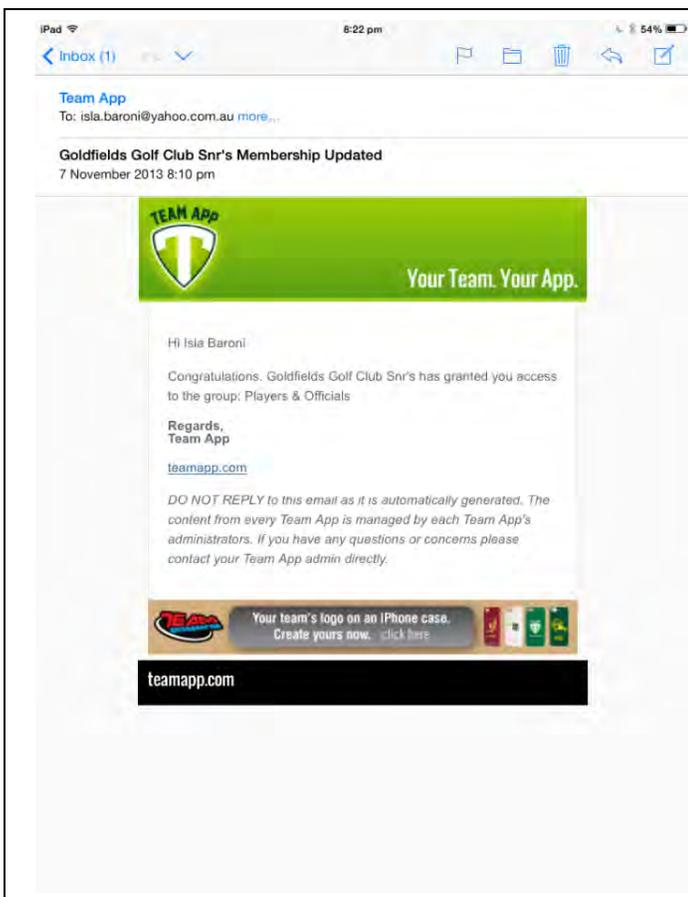

PLATE 23

The member will receive an email, "Congratulations. Goldfields Golf Club Snr's has granted you access to the group, Players & Officials"

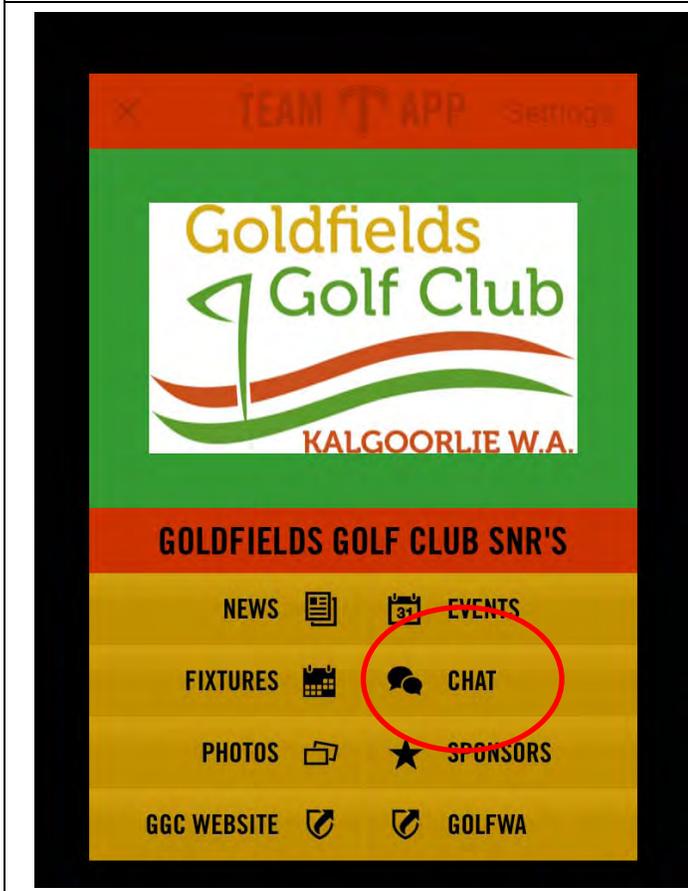

PLATE 24

This is the App's current appearance. One area in trialing that was a little quirky was the "Chat" function. The notification chime does not always ring.

The particular function needs further investigation as it is a public forum (it's a closed forum, but available to approved users).

It has huge potential, for the Juniors as a "Clubs For Sale" chat thread with enable parents to sell clubs that their children have out grown.

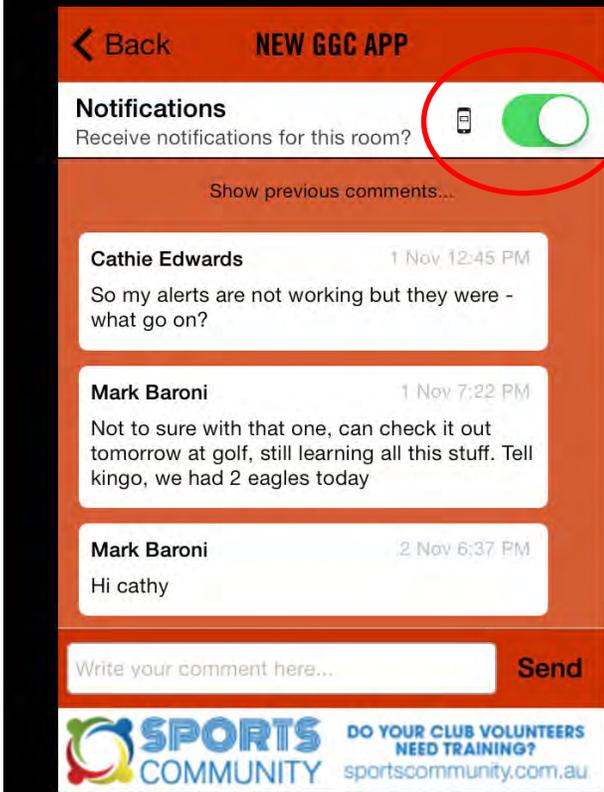

PLATE 25

If a user wants to keep track of a chat thread, they can simply, slide the selector across to receive notifications of a new post.

However if the user is logged out of the app, the notification won't be received.

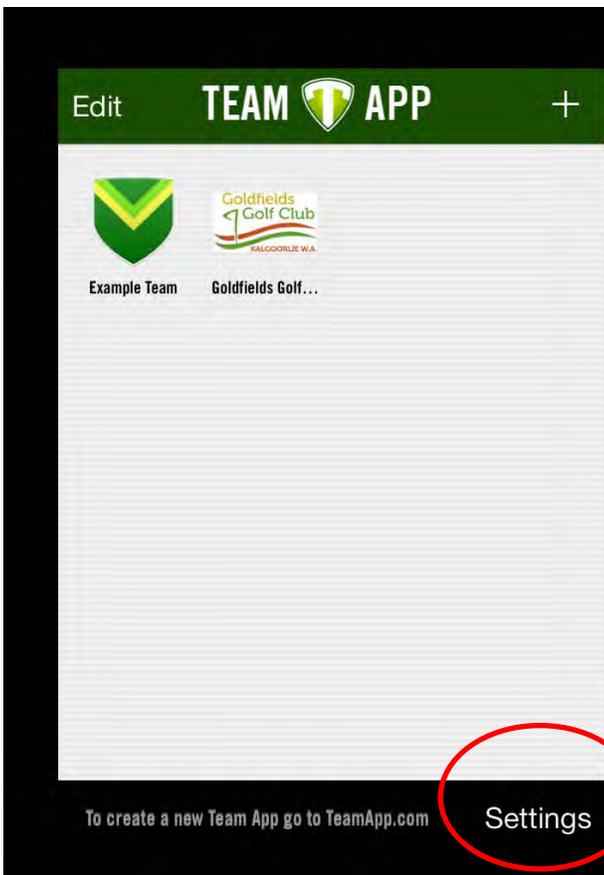

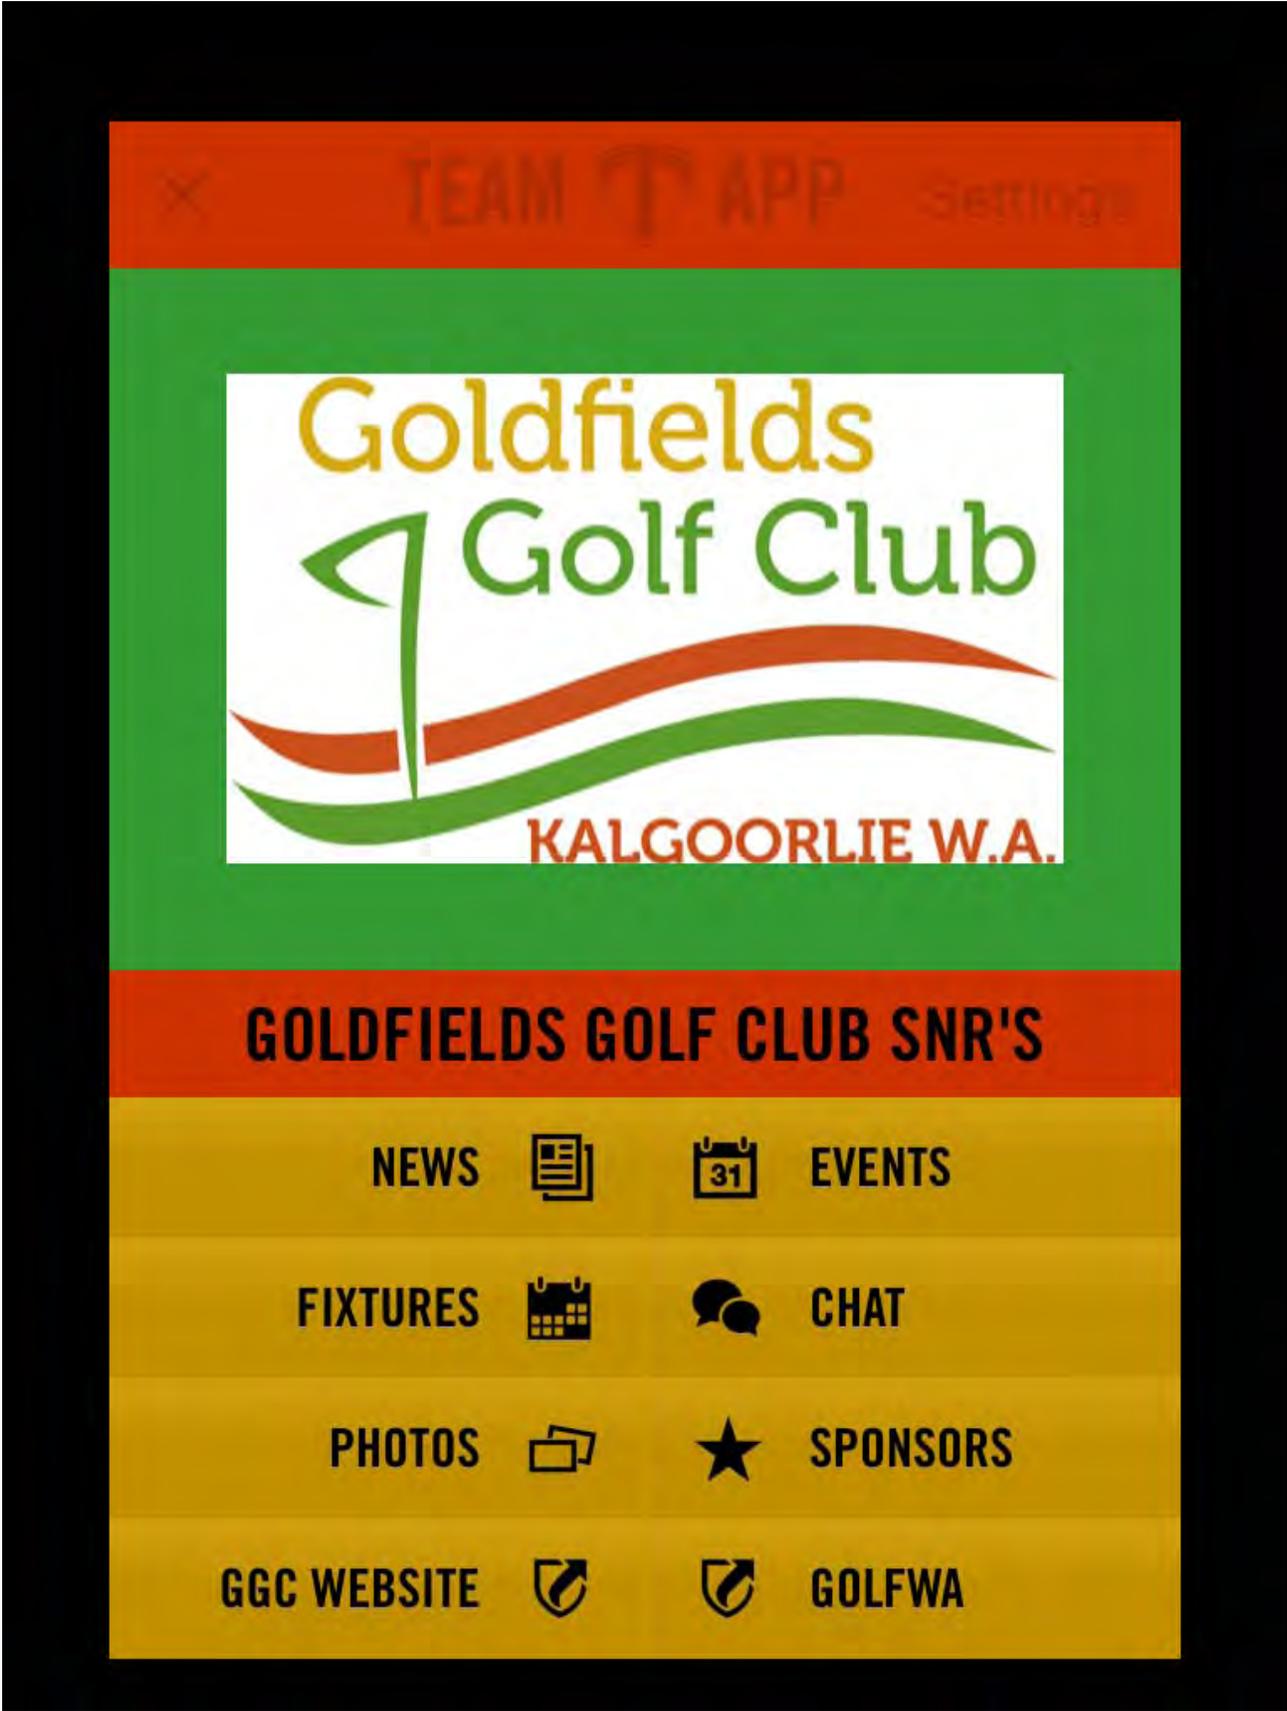

PLATE 26

A user can log out under the **Settings** button below or change their details, such as their email address.

SENIOR APPLICATION - APPEARANCE

JUNIOR APPLICATION - APPEARANCE
